SOUFFLÉ COLLECTION

cod. SC_BLACKBERRY

Crepax mastery of this art is richly embodied by this uncommon piece. This vase, whose name recalls the irregular shapes of wild berries has an intense black color that brings out the contrast with the pink lavender one. The nuances chosen, at once soft and strong, allow this piece to give character to any room it is put into, without clashing with the rest of the interior design. Its height of 10 x 40 x 20 cm, make it adaptable to many environments. The borders made with threads of fire cane, which end with a swirl at the opening typical of the soufflé collection, close off a glass blown vase that demands – and gets – attention.
